Two years War Debt of Mr. Lincoln.....	\$690

These figures are a sufficient reputation of the extravagant and oft-repeated statements that the Debt for the suppression of the rebellion is *raised up at the rate of one million per annum* per Customs Revenue, over and above the Public. It has defrayed the expenses of the ordinary Civil of the Government, while the addition made to the Public Debt of all classes, increased through the years of a great war, *less than one million of dollars*. And the story, oft-repeated, but recently

The information on this point from the Department of January, 1929, is as follows: The number of claims amounted to \$4,000,000. At the close of December last, like information was commingled and the amount stated at \$4,000,000. It is doubtful if the requirement of the law is being met, at the present time, inasmuch as to much as this last-mentioned amount is to be included in the total. Including all claims outstanding and accumulated against the Government, on the part of the official receiver, the total may possibly be larger.
